## About Department

We started our journey in the year of 2004. Over years, shelter, water & communications have remained always on priority in national planning. To overcome all problems of population and urbanization in infrastructural development, role of civil engineer is of prime importance even in era of IT.

Civil Engineering is the oldest Engineering Discipline after Military Engineering. It is traditionally broken into different disciplines including Environmental Engineering, Structural Engineering, Transportation Engineering, Water Resource Engineering, Geo-technical Engineering, Material Engineering, Survey Engineering and Construction Engineering.

Civil Engineering takes place at all levels in the public sector and private sector. Civil engineers will always be needed to maintain and repair existing facilities and structures and to construct new ones.

## Department Role
