

POLYTECHNIC

Department of Mechanical Engineering

Vision

Create competent mechanical engineers with good humanities, leadership and entrepreneurship qualities for Global Development .

Mission

M1: To impart quality education through demanding academic programme.

M2: To increase employability through Industrial interaction and Entrepreneurship Development.

M3: To enhance technical skills and social awareness.

Mechanical engineering is versatile and evergreen branch of engineering. Mechanical engineer can work in various specialized area like automotive system, aerospace engineering, design engineering, dynamic system and control, power plant engineering, etc. and most importantly in software field also.

Department has well qualified and dedicated faculties with well developed laboratories. We impart quality engineering education through sound theoretical knowledge, hands on laboratory as well as computational skill and exposure to recent technologies by visiting industries.

Mr. S. C. Chikurde

M.E. (Mechanical)
HOD Mechanical Engineering
