INFORMATION TECHNOLOGY DEAPRTMENT

ABOUT DEPARTMENT

We started our journey in the year of 1996. To produce highly qualified, well rounded and motivated graduates who can meet new technical challenges, contribute effectively as team members and be innovators in computer hardware, software, design and application.

To pursue creative research and new technologies in computer engineering and across disciplines in order to serve the needs of industry, government, society and the scientific community. To inculcate strong ethical values and responsibility towards society.

This has been achieved by the collective and responsive effort of the faculty, the supporting staff and the students.

DEPARTMENT ROLE:

- The department is well equipped with excellent computing facilities, and has highly qualified faculty specialized in areas like Multimedia Communications, Wireless Networking, VLSI design, Data Mining etc.
- The department is organized workshops, IN-Plant training, industrial visits and Faculty Development Programs.
- The courses leading to a Diploma in Computer Engineering were started in the year 1996. The department presently has highly qualified and experienced staff on its role. The department has well equipped laboratories on the following subjects.
- Advanced Web Technology
- Advanced Microprocessor
- Visual Studio.Net
- Computer Hardware & Peripherals
- Object Oriented Programming
 - Advance Java and Java Programming, Oracle

CARRIER FORECASTS:

- Computer engineers specialize in areas like digital systems, operating systems, computer networks, software, etc.
- Graduates of computer engineering find employment in a variety of settings, such as universities, industry, and government organizations.
- Computer engineer can lead as computer network architect, programmer, Computer hardware Engineer. Application engineer, System engineer etc.
- IT engineers can grab interesting jobs like computer programming, Systems Analyzing, software and hardware development, web designing, networking, software testing etc.
- Computer engineering has grown and matured into a dynamic major helping to drive the wave of technological growth in the world.

HOD DESK

Mrs. A. S. Khandagale
ME(Computer)
I/c Head of Department (IF)

It gives me immense pleasure to lead the department of Information Technology. An Information Technology degree is one of the most aspired degrees today for both undergraduate and post graduate students.

Information Technology can be used widely in all the sectors of the economy and even in the education sector so it has become the most preferred career option all over the world. It offers a bright future for the innovative and growth oriented students.

One of our main objectives is to overcome the gap between theories and practical that will help them to become career-oriented and to work at global level.

The motto of our department is to provide quality education. Our Academic Staffs are all well qualified in the relevant areas. Academic standards, practical work, self-discipline and responsibility are the some key parameters as far as the Department is concerned.

I wish all the Students and Faculties a great academic career.

VISION, MISSION PEO, PSO, PO

Vision:

“To confer technical education in IT field to generate value based output.”

Mission:

M1: Enrich intellectual potential of students with technical knowledge.

M2: Imbibe social awareness in students to serve the society.

Programme Educational Objectives (PEO's):

After completion of diploma in Information Technology, students will be able to:

PEO 1: Analyse, formulate and solve the problems associated with IT.

PEO 2: Apply lifelong learning to become successful professional.

Program Specific Outcome (PSO'S):

Students will be able to:

PSO 1: Use fundamental concepts of hardware and software systems.

PSO 2: Create innovative carrier path as an Employee/Entrepreneur or go for higher studies.

PROGRAM OUTCOMES (POs)

1. Basic knowledge: An ability to apply knowledge of basic mathematics, science and engineering to solve the engineering problems.
2. Discipline knowledge: An ability to apply discipline - specific knowledge to solve core and/or applied engineering problems.
3. Experiments and practice: An ability to plan and perform experiments and practices and to use the results to solve engineering problems.
4. Engineering Tools: Apply appropriate technologies and tools with an understanding of the limitations.
5. The engineer and society: Demonstrate knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to engineering practice.

6. Environment and sustainability: Understand the impact of the engineering solutions in societal and environmental contexts, and demonstrate the knowledge and need for sustainable development.
7. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
8. Individual and team work: Function effectively as an individual, and as a member or leader in diverse/multidisciplinary teams.
9. Communication: An ability to communicate effectively.
10. Life-long learning: Recognize the need for, and have the preparation and ability to engage in Independent and life-long learning in the context of technological changes.
