## WORK EXPERIENCE

### Software Tester Cognizant Technology Solutions

02/2022 - 06/2024

Pune, India

#### Achievements/Tasks

- Compiled and communicated comprehensive test results, defects, and project progress to stakeholders. Facilitated prompt decision-making and improved project efficiency by 20% through detailed weekly status reports.
- Analyzing and improving software systems, enhancing performance and scalability by 30%.
- Implemented database optimizations to improve query response times by 40%, enhancing user experience and scalability of the platform.
- Participated in test planning and test case design, ensuring comprehensive coverage of functional and regression testing scenario.

### Junior Software Tester Neeyamo Enterprise Solutions

01/2021 - 11/2021

Pune, India

#### Achievements/Tasks

- Conducted extensive manual testing for the Flexi Module, thoroughly examining its functionality, usability, and compatibility with the PNC Payroll system. Enabled Siemens clients to submit payroll information within 10 minutes.
- Collaborated closely with the development team to analyze and resolve defects, achieving a high-resolution rate of 95% within specified timelines.
- Developed 150 comprehensive test cases, 80 test scenarios, and 50 test scripts based on business requirements and user stories, achieving 90% coverage of identified functionalities.
- Executed regression testing on PNC Software to ensure that new features or changes to the software do not negatively impact existing functionality.

## EDUCATION

### B.E (Computer Engineering) Marathwada Mitra Mandal's College of Engineering

07/2016 - 07/2020

Pune, India

## SKILLS

Java Postman Selenium Manual Testing

Automation Testing SQL Regression Testing

Load Testing Agile API Testing JIRA

JMeter Bug Tracking and Reporting

## PERSONAL PROJECTS

### Automation Testing of Sololearn Website using Selenium Web Driver

- The performance tests were carried out to evaluate page load times across different sections of the website and to assess its responsiveness under varying traffic conditions, ensuring stability and reliability.
- The results revealed a test pass rate of 98%, underscoring the effectiveness and accuracy of the automated testing approach in validating button behaviors and ensuring optimal user interaction

### Performance Testing of a Weather Application

- Conducted performance and load testing on a weather forecasting application using JMeter.
- Identified and resolved performance bottlenecks, improving the application's response time by 40% under high traffic conditions.

### Manual Testing of IRCTC Website

- Created comprehensive test cases for various functionalities such as user login, train search, ticket booking, payment processing and cancellation.
- The results revealed a test pass rate of 93%, highlighting the thoroughness and accuracy of the manual testing process in validating the functionalities of the train booking system and ensuring an optimal user experience.
