Pune

Education

● Bachelor of Engineering

Computer Science | AISSMS-IOIT

2019-2023

CGPA: 8.09

Skills

Programming Language:

Semantic HTML5 tags, CSS, JavaScript, C++, Bootstrap, Python

Software & Tools: Linux, Nmap, Cryptool, Metasploitable Framework

Company Name: TechCognitives

● Associate Frontend Developer

Project 1# Web Revamp

Nov 2023 - April 2024

- Conducted a thorough analysis of the existing TechCognitives website to understand its structure, design, and functionality.
- Developed a detailed site map and flow diagram to visualize the website's layout and user journey.
- Incorporated feedback from senior developers to refine the flow diagram and ensure it met the project's objectives and standards.
- Assisted in implementing the approved design changes using HTML, CSS, and JavaScript, focusing on improving responsiveness and user interface elements.
- Made the website dynamic by using JavaScript to add interactive features and enhance user engagement.

● College Project

Jan 2017 - Dec 2029

Project 2# Land Cover Mapping Using Semantic Segmentation Models

- Utilizing deep learning techniques to develop a web application for land cover segmentation on satellite imagery.
- Analyzed land cover patterns and clustered areas based on similar land cover classes.
- Contributed in developing a tool that classifies the land based on image for future development.
